Volume 62 1976

Table of Contents

No. 1 pp. 1–216 issued on February 2, 1976
No. 2 pp. 217–424 issued on February 16, 1976
No. 3 pp. 425–626 issued on March 1, 1976

1 The Structure of Teichoic Acid from *Bacillus subtilis* var. *niger* WM as Determined by ^{13}C Nuclear-Magnetic-Resonance Spectroscopy
W. R. de Boer, F. J. Kruyssen, J. T. M. Wouters, and C. Kruk

7 The Control of the Adenosine Triphosphatase of *Rhodospirillum rubrum* Chromatophores by Divalent Cations and the Membrane High Energy State
P. A. Edwards and J. B. Jackson

15 Inhibition of Lobster-Muscle Arginine Kinase by Homologous Antibodies and Study of an Antibody Population Directed against a Tyrosine-Containing Antigenic Structure
Y. Benyamin and Y. Robin

21 Physical Studies of Chromatin. The Recombination of Histones with DNA
P. G. Boseley, E. M. Bradbury, G. S. Butler-Browne, B. G. Carpenter, and R. M. Stephens

33 The Formation of *threo*-11-Hydroxy-*trans*-12:13-epoxy-9-*cis*-octadecenoic Acid by Enzymic Isomerisation of 13-L-Hydroperoxy-9-*cis*,11-*trans*-octadecadienoic Acid by Soybean Lipoxygenase-1
G. J. Garssen, G. A. Veldink, J. F. G. Vliegenthart, and J. Boldingh

37 Subcellular Distribution of Histone-Degrading Enzyme Activities from Rat Liver
P. C. Heinrich, G. Raydt, B. Puschendorf, and M. Jusić

45 A Proton-Relaxation-Time Study of the Conformation of Some Purine and Pyrimidine 5′-Nucleotides in Aqueous Solution
C. Chachaty, T. Zemb, G. Langlet, Tran Dinh Son, H. Buc, and M. Morange

55 Levansucrase of *Bacillus subtilis*: Kinetic and Thermodynamic Aspects of Transfructosylation Processes
R. Chambert and G. Gonzy-Tréboul

65 Protein Degradation and Proteinases during Yeast Sporulation
H. Betz and U. Weiser

77 Anion and Amine Uptake and Uncoupling in Submitochondrial Particles
G. F. Azzone, H. Gutweniger, E. Viola, E. Strinna, S. Massari, and R. Colonna

87 Kinetics of Adenosine 3′:5′-monophosphate Accumulation in Dog Thyroid Slices
S. Swillens, J. van Sande, R. Pochet, D. Delbeke, M. Piccart, M. Paiva, and J. E. Dumont

95 Inactivation of *Bacillus cereus* β-Lactamase by Halogenated Isoxazolylpenicillins
R. Strom, G. Ravagnan, and V. Salfi

103 A Study of the Lysyl Residues in the Basic Pancreatic Trypsin Inhibitor using ^{1}H Nuclear Magnetic Resonance at 360 MHz
L. R. Brown, A. de Marco, G. Wagner, and K. Wüthrich

109 Effect of Triiodothyronine on Rat Liver Chromatin Protein Kinase
J. Kruh and L. Tichonicky

117 The Involvement of Protein L 11 in the Joining of the 30-S Initiation Complex to the 50-S Subunit
N. Naaktgeboren, P. Schrier, W. Möller, and H. O. Voorma

125 Pyruvate Carboxylase: Affinity Labelling of the Magnesium Adenosine Triphosphate Binding Site
S. B. Easterbrook-Smith, J. C. Wallace, and D. B. Keech

131 A DNA Polymerase from *Ustilago maydis*. 1. Purification and Properties of the Polymerase Activity
G. R. Banks, W. K. Holloman, M. V. Kairis, A. Spanos, and G. T. Yarranton

143 A DNA Polymerase from *Ustilago maydis*. 2. Properties of the Associated Deoxyribonuclease Activity
G. R. Banks and G. T. Yarranton

151 Purification and Properties of Formaldehyde Dehydrogenase and Formate Dehydrogenase from *Candida boidinii*
H. Schütte, J. Flossdorf, H. Sahm, and M.-R. Kula

161 Characterization of Polysomes from *Xenopus* Liver Synthesizing Vitellogenin and Translation of Vitellogenin and Albumin Messenger*RNA*'s *in vitro*
M. V. Berridge, S. R. Farmer, C. D. Green, E. C. Henshaw, and J. R. Tata

173 Renaturation of Bacteriophage Lambda DNA. Determination of the Optimal Renaturation Conditions Using a Single-Strand-Specific DNase and Alkaline-Sucrose-Gradient Assay System
T. G. Fanning, P. H. Schreier, and R. W. Davies

181 Formation of Uridine Diphosphate 2-Deoxy-D-glucose and Guanosine Diphosphate 2-Deoxy-D-glucose *in vitro* Using Animal Enzymes
R. T. Schwarz and M. F. G. Schmidt

189 The Reconstitution of *Anacystis nidulans* DNA-Dependent RNA Polymerase from Its Isolated Subunits
F. Herzfeld and M. Kiper

193 Yeast Ribosomal Proteins are Synthesized on Small Polysomes
W. H. Mager and R. J. Planta

199 A Plasmocytoma Ribosome-Associated Protein Kinase which Phosphorylates a Specific Protein of the Ribosomal KCl Wash
C. Quirin-Stricker, M. Schmitt, J.-M. Egly, and J. Kempf

211 New Coenzymically-Active Soluble and Insoluble Macromolecular NAD^+ Derivatives
P. Zappelli, A. Rossodivita, G. Prosperi, R. Pappa, and L. Re

217 Regulation of Cyanide-Insensitive Respiration in *Neurospora*
D. L. Edwards and E. Rosenberg

223 Hamster Brown-Adipose-Tissue Mitochondria. Purine Nucleotide Control of the Ion Conductance of the Inner Membrane, the Nature of the Nucleotide Binding Site
D. G. Nicholls

229 Evidence that DNA Polymerase-α of Calf Thymus Contains a Subunit of Molecular Weight 155000
A. M. Holmes, I. P. Hesslewood, and I. R. Johnston

237 *N*-Acetyl-9-O-L-lactylneuraminic Acid, a New Acylneuraminic Acid from Bovine Submandibular Gland
R. Schauer, J. Haverkamp, M. Wember, J. F. G. Vliegenthart, and J. P. Kamerling

243 The Binding of Met-$tRNA_f$ to Isolated 40-S Ribosomal Subunits and the Formation of Met-$tRNA_f$ · 80-S-Ribosome Initiation Complexes
K. E. Smith, A. C. Richards, and H. R. V. Arnstein

257 Phase Transitions in the Membrane of a Marine Bacterium, *Pseudomonas* BAL-31
N. Tsukagoshi, M. H. Petersen, U. Huber, R. M. Franklin, and J. Seelig

263 Binding of Secretory Component to Dimers of Immunoglobulin A *in vitro*. Mechanism of the Covalent Bond Formation
E. Lindh and I. Björk

271 Binding of Secretory Component to Human Immunoglobulin *M*
E. Lindh and I. Björk

279 Differentiation of the Nucleotide Pyrophosphatases of Rat-Liver Plasma Membrane and Endoplasmic Reticulum by Enzymic Iodination
E. Bischoff, J. Wilkening, T.-A. Tran-Thi, and K. Decker

285 Enzyme-Linked Immunoassay. Conjugation of Rabbit Anti-(Human Immunoglobulin G) Antibody with β-D-Galactosidase from *Escherichia coli* and Its Use for Human Immunoglobulin G Assay
K. Kato, Y. Hamaguchi, H. Fukui, and E. Ishikawa

293 Histidyl Transfer Ribonucleic Acid Synthetase from *Salmonella typhimurium.* Interaction with Substrates and ATP Analogues
P. Di Natale, A. N. Schechter, G. Castronuovo Lepore, and F. De Lorenzo

299 Organization of Vitellogenin Polysomes, Size of the mRNA and Polyadenylate Fragment
J.-P. Jost and G. Pehling

307 On the Mechanism of Amylose Branching by Potato Q-Enzyme
D. Borovsky, E. E. Smith, and W. J. Whelan

313 Molecular-Weight Determination of Animal-Cell RNA by Electrophoresis in Formamide under Fully Denaturing Conditions on Exponential Polyacrylamide Gels
G. Spohr, M.-E. Mirault, T. Imaizumi, and K. Scherrer

323 Couplage de la corticotropine-β^{1-24} avec le système adénylate cyclase des adipocytes de rat. Mise en évidence d'une interaction hormone-nucléotides
J. Pairault

335 Ion-Binding to Phospholipids. Interaction of Calcium with Phosphatidylserine
H. Hauser, A. Darke, and M. C. Phillips

345 Accumulation of Replicative DNA Intermediates in *Tetrahymena* after Excision-Repairable Damage to DNA
B. Johnson and O. Westergaard

353 Transcription of Specific Genes in Isolated Nuclei from HeLa Cells *in vitro*
A. Udvardy and K. H. Seifart

365 Deoxyribosyl Transfer Catalysis with *trans-N*-Deoxyribosylase. Kinetic Study of Purine(Pyrimidine) to Pyrimidine(Purine) *trans-N*-Deoxyribosylase
C. Danzin and R. Cardinaud

373 Elongation Factor T from *Bacillus stearothermophilus* and *Escherichia coli.* Purification and Some Properties of EF-Tu and EF-Ts from *Bacillus stearothermophilus*
A. Wittinghofer and R. Leberman

383 Norepinephrine-Induced Shift in Levels of Adenosine 3′:5′-monophosphate and ATP Parallel to Increased Respiratory Rate and Lipolysis in Isolated Hamster Brown-Fat Cells
B. Pettersson and I. Vallin

391 The Linkage of Lysine in the O-Specific Chains of *Proteus mirabilis* 1959
W. Gromska and H. Mayer

401 The Enzymic Addition of Poly(A) to the 3′-End of RNA using Bacteriophage MS 2 RNA as a Model System
R. Devos, E. Gillis, and W. Fiers

411 UDP-glucuronyltransferase in Perfused Rat Liver and in Microsomes. Glucuronidation of Bilirubin
M. M. Abou-El-Makarem and K. W. Bock

417 Comparison of Cytoplasmic and Nuclear Poly(A)-Containing RNA Sequences in *Xenopus* Liver Cells
G. U. Ryffel

425 Studies on New Intracellular Proteases in Various Organs of Rats. Participation of Proteases in Degradation of Ornithine Aminotransferase *in vitro* and *in vivo*
E. Kominami and N. Katunuma

431 The Binding of Lipid to the Lipid-Free Adenosine Triphosphatase Protein of Sarcoplasmic Reticulum
P. M. D. Hardwicke

439 Characterization and Replication Control of Plasmids from *Enterobacter cloacae* DF 13
G. M. Zandvliet and H. S. Jansz

451 The Involvement of RNA in the Initiation of DNA Synthesis in Mammalian Cells. Artifacts Arising during Caesium-Salt Density-Gradient Centrifugation which Simulate a Covalent Attachment of RNA to Newly Synthesized DNA
C. K. Pearson, P. B. Davis, A. Taylor, and N. A. Amos

461 The Similarity between the Primary Structures of Two Non-histone Chromosomal Proteins
J. M. Walker, G. H. Goodwin, and E. W. Johns

471 Synthesis of Ribosomal RNA during the Mitotic Cycle in the Slime Mould *Physarum polycephalum*
L. Hall and G. Turnock

479 A Possible Correlation between Lipid Hydration and Lipid Activation of the C_{55}-Isoprenoid Alcohol Phosphokinase Apoprotein
H. Sandermann, Jr

485 The Threonine-Sensitive Homoserine Dehydrogenase and Aspartokinase Activities of *Escherichia coli* K-12. Incubation of the Enzyme in Alkaline Conditions: Dissociation and Disulfide-Bridge Formation
Y. Jacques and P. Truffa-Bachi

491 Replication of *Escherichia coli* DNA *in vitro:* Inhibition by Oxolinic Acid
W. L. Staudenbauer

499 The Trypsin and Chymotrypsin Inhibitors in Chick Peas (*Cicer arietinum L.*). Identification of the Trypsin-Reactive Site, Partial-Amino-Acid Sequence and further Physico-chemical Properties of the Major Inhibitor
M. Belew and D. Eaker

509 Molecular Modifications Associated with Ageing of Globin Messenger RNA *in vivo*
P. Nokin, G. Huez, G. Marbaix, A. Burny, and H. Chantrenne

519 Homoserine Kinase from *Escherichia coli* K 12
B. Burr, J. Walker, P. Truffa-Bachi, and G. N. Cohen

527 Decreased Rate of Metabolism Induced by a Shift of the Double Bond in Prostaglandin $F_{2\alpha}$ from the Δ^5 to the Δ^4 Position
K. Gréen, B. Samuelsson, and B. J. Magerlein

539 Phosphorylation of Microtubule-Associated Proteins
L. Rappaport, J. F. Leterrier, A. Virion, and J. Nunez

551 A Simple Method for Measuring Specific Radioactivities of Ribonucleoside Triphosphates using RNA Polymerase
R. E. Maxson, Jr, and R. S. Wu

555 Antigenic Determinants of Murein Lipoprotein and Its Exposure at the Surface of Enterobacteriaceae
V. Braun, V. Bosch, E. R. Klumpp, I. Neff, H. Mayer, and S. Schlecht

567 Inhibition by Triphenyltin Chloride of a Tightly-Bound Membrane Component Involved in Photophosphorylation
J. M. Gould

577 A Calorimetric Study of the CO Bohr Effect of Monomeric Haemoglobins
K. Gersonde, L. Noll, H. T. Gaud, and S. J. Gill

583 Conformational Studies of Two Non-histone Chromosomal Proteins and Their Interactions with DNA
P. D. Cary, C. Crane-Robinson, E. M. Bradbury, K. Javaherian, G. H. Goodwin, and E. W. Johns

591 Aldehyde Oxidase and Xanthine Dehydrogenase from Wild-Type *Drosophila melanogaster* and Immunologically Cross-Reacting Material from *ma*-l Mutants. Purification by Immunoadsorption and Characterization
R. Y. Andres

601 Succinylation of Glyceraldehyde-3-Phosphate Dehydrogenase from *Bacillus stearothermophilus*. A Reactive Threonine Residue in the Apoenzyme
G. Allen and J. I. Harris

613 Membrane-Reversible H^+-ATPase from *Micrococcus lysodeikticus*
E. I. Mileykovskaya, G. V. Tikhonova, A. A. Kondrashin, and I. A. Kozlov

619 Active-Site-Directed Inhibition of the Plasma-Membrane Carrier Transporting Short-Chain, Neutral Amino Acids into *Trypanosoma brucei*
M. J. Owen and H. P. Voorheis

625 Correction
